

Hermes Zyte Scraper Contribution Session

Date: June 18, 2026

Author: deepspace28 (DeepSpace / jishnav)

This document summarizes all work performed today to bundle the hermes-zyte-scraper plugin (v1.3.0) into the official Nous Research Hermes Agent repository for public use.

1. Project Goal

Contribute production-grade Zyte + Scrapy Cloud scraping capabilities to NousResearch/hermes-agent so all Hermes users can enable the plugin via the standard plugin system.

- Upstream standalone repo: deepspace28/hermes-zyte-scraper (v1.3.0)
- Target main repo: NousResearch/hermes-agent
- Contribution method: Fork -> feature branch -> Pull Request

2. What Was Built

Plugin: plugins/scraping/hermes-zyte-scraper/

- kind: standalone (opt-in, not enabled by default)
- zyte_extract - multi-page Zyte API extraction with auto schema inference
- zyte_build_spider - natural language to Scrapy + Zyte project
- zyte_deploy - deploy to Scrapy Cloud via shub
- zyte_schedule - one-time or cron spider runs
- zyte_list_jobs - monitor Scrapy Cloud jobs
- zyte_get_results - fetch items from storage.zyte.com

Integration changes

- hermes_cli/config.py - registered ZYTE_API_KEY, SCRAPY_CLOUD_API_KEY, SCRAPY_CLOUD_PROJECT_ID
- .env.example - documented new environment variables
- website/docs/reference/environment-variables.md - full env var docs
- website/docs/user-guide/features/built-in-plugins.md - plugin listed
- tests/plugins/scraping/ - plugin discovery and tool unit tests
- skills/zyte-scraping/SKILL.md - Hermes workflow skill
- scripts/run_battle_matrix.py - live validation script

3. Final Commit (20 Files)

- .env.example
 - hermes_cli/config.py
 - plugins/scraping/hermes-zyte-scraper/.gitignore
 - plugins/scraping/hermes-zyte-scraper/LICENSE
 - plugins/scraping/hermes-zyte-scraper/README.md
 - plugins/scraping/hermes-zyte-scraper/__init__.py
 - plugins/scraping/hermes-zyte-scraper/operations.py
 - plugins/scraping/hermes-zyte-scraper/plugin.yaml
 - plugins/scraping/hermes-zyte-scraper/requirements.txt
 - plugins/scraping/hermes-zyte-scraper/schemas.py
 - plugins/scraping/hermes-zyte-scraper/scripts/run_battle_matrix.py
 - plugins/scraping/hermes-zyte-scraper/skills/zyte-scraping/SKILL.md
 - plugins/scraping/hermes-zyte-scraper/templates/high_quality_spider.py.template
 - plugins/scraping/hermes-zyte-scraper/tests/fixtures/battle_matrix_expected.json
 - plugins/scraping/hermes-zyte-scraper/tools.py
 - plugins/scraping/hermes-zyte-scraper/zyte_helpers.py
 - tests/plugins/scraping/test_hermes_zyte_scraper_plugin.py
 - tests/plugins/scraping/test_hermes_zyte_scraper_tools.py
 - website/docs/reference/environment-variables.md
 - website/docs/user-guide/features/built-in-plugins.md
- Removed before final commit: pytest.ini, tests/test_tools.py (obsolete; tests live in repo tests/)

4. Work Timeline Today

Phase 1: Batch push via GitHub MCP

Attempted to push 4 prepared batch JSON files to deepspace28/hermes-agent branch feat/bundle-hermes-zyte-scraper using grok_com_github MCP push_files.

- batch1.json - 15 files (plugin core, tests, scripts)
- batch2.json - 3 files (tools.py and related)
- batch3.json - 1 file (environment-variables.md)
- batch4.json - 1 file (hermes_cli/config.py, ~320KB)
- Result: FAILED - 403 Resource not accessible by personal access token
- Cause: Copilot/MCP PAT is read-only for repository git writes

Phase 2: Clarified target repository

Confirmed deepspace28/hermes-agent is a fork of NousResearch/hermes-agent. The real goal is a Pull Request to NousResearch main, not just the fork.

Phase 3: Built clean contribution branch

Created feat/zyte-scraper-upstream-pr rebased on latest NousResearch/main (single commit, 20 files, no obsolete test files).

- Local commit SHA: 12b15cf907e0a70960ee52191d90f3ea391253e8
- Patch exported: /tmp/zyte-upstream-pr.patch

Phase 4: Successful push to fork

Using user-provided GitHub PAT with Contents write on deepspace28/hermes-agent, force-pushed feat/zyte-scraper-upstream-pr to fork.

- Fork branch updated: 06c9d6bc4 -> 12b15cf90
- Diff vs NousResearch/main: 1 commit ahead, 20 files changed

Phase 5: Pull Request

Automatic PR creation via gh CLI failed (token lacked Pull Requests write on NousResearch/hermes-agent). PR must be opened in browser (one click).

5. Current Git State

Repository URLs:

```
Upstream:  https://github.com/NousResearch/hermes-agent
Fork:      https://github.com/deepspace28/hermes-agent
Plugin:    https://github.com/deepspace28/hermes-zyte-scraper
```

Branches:

- feat/zyte-scraper-upstream-pr - CLEAN (1 commit) - USE FOR PR

- feat/bundle-hermes-zyte-scraper - older (43 commits, includes obsolete files)

Final pushed commit: 12b15cf907e0a70960ee52191d90f3ea391253e8

6. Pull Request Details

Compare link (open in browser)

<https://github.com/NousResearch/hermes-agent/compare/main...deepspace28:feat/zyte-scraper-upstream-pr?>

PR Title

feat(plugins): bundle hermes-zyte-scraper with Zyte/Scrapy Cloud integration

PR Description

Bundles hermes-zyte-scraper v1.3.0 as an opt-in standalone plugin under plugins/scraping/hermes-zyte-scraper/.

What this adds:

- Plugin (kind: standalone) with `zyte_extract`, `zyte_build_spider`, `zyte_deploy`, `zyte_schedule`, `zyte_list_jobs`, `zyte_get_results`
- Env registry for `ZYTE_API_KEY`, `SCRAPY_CLOUD_API_KEY`, `SCRAPY_CLOUD_PROJECT_ID`
- Docs and integration tests

Enable:

```
pip install -r plugins/scraping/hermes-zyte-scraper/requirements.txt
hermes plugins enable scraping/hermes-zyte-scraper
```

Upstream: <https://github.com/deepspace28/hermes-zyte-scraper> (v1.3.0)

Testing:

```
python -m pytest tests/plugins/scraping/ -v
```

7. How Users Enable After Merge

```
pip install -r plugins/scraping/hermes-zyte-scraper/requirements.txt
hermes plugins enable scraping/hermes-zyte-scraper
```

Required environment variables (set in ~/.hermes/.env):

- ZYTE_API_KEY - Zyte API extraction and spider runs
- SCRAPY_CLOUD_API_KEY - Scrapy Cloud deploy, schedule, results
- SCRAPY_CLOUD_PROJECT_ID - numeric project ID (e.g. 867424)

8. Environment Variables Added to Hermes

Registered in hermes_cli/config.py OPTIONAL_ENV_VARS with tool associations for the zyte toolset. Documented in website/docs and .env.example.

9. Testing Performed / Available

- Unit tests: tests/plugins/scraping/test_hermes_zyte_scraper_plugin.py
- Unit tests: tests/plugins/scraping/test_hermes_zyte_scraper_tools.py
- Battle matrix script: plugins/scraping/hermes-zyte-scraper/scripts/run_battle_matrix.py
- Expected minimums: tests/fixtures/battle_matrix_expected.json

Run tests:

```
pip install -r plugins/scraping/hermes-zyte-scraper/requirements.txt
python -m pytest tests/plugins/scraping/ -v
```

10. Issues Encountered & Resolutions

- MCP push_files 403 -> Copilot PAT cannot write to repos
- CallMcpTool server not found initially -> used direct MCP HTTP API
- Messy 43-commit branch -> rebuilt clean 1-commit branch from origin/main
- gh pr create 403 -> PAT needs Pull Requests write on NousResearch repo; use browser
- Obsolete pytest.ini and test_tools.py -> removed in clean branch

11. Remaining Steps

- 1. Open compare link in browser (logged in as deepspace28)
- 2. Click Create pull request
- 3. Paste title and description from Section 6
- 4. Wait for Nous Research CI and code review
- 5. Revoke GitHub PAT shared in chat (security)
- 6. After merge: announce plugin availability to users

12. Artifacts Created Today

- /tmp/zyte_batches/batch1-4.json - MCP push payloads
- /tmp/zyte-upstream-pr.patch - git format-patch of clean commit
- /tmp/zyte-pr-body.md - PR description markdown
- /tmp/complete-zyte-contribution.sh - push + PR automation script
- /root/hermes-zyte-scraper-session-summary-2026-06-18.pdf - this PDF summary

End of session summary. Generated automatically from contribution session on June 18, 2026.
